

Thank you for your interest in our puppies. It is our intent with breeding to pick one or several of the puppies from each litter to remain here at LabradorsRUs. It is unknown which puppy or puppies will be chosen to stay here until the litter is eight (8) weeks of age. At eight weeks of age, the litter is evaluated and all potential show prospects (if any) are chosen. We reserve the right to keep all potential show prospects from each litter.

After we receive your questionnaire, we will contact you to determine the best pup for you. Your puppy will be selected for you, based on the information we have about you. If you have more you would like to tell us about your family, and what you are looking for, do not hesitate to include it with this questionnaire. It is important for you to understand that the puppies live with us 24/7 and we know the individual personalities of the puppies that will best suit you and your family's needs and life style. We encourage our families to come visit the puppies before they go home. Feel free to let us know your thoughts on any of the specific puppies after this visit, but remember, we will not know which puppies will actually be available for adoption until after their evaluations at 8 weeks of age.

Following the evaluation at 8 weeks of age, all puppies are given their first set of shots. You may pick up your puppy once it has received its vaccinations and had its veterinary examination. If when you arrive to pick up your puppy and you don't find him/her suitable, then your deposit shall be immediately refunded. You may return your puppy within the first week for a full refund. All transportation costs will be your responsibility.

It is possible that you may have requested, for example, a black male puppy, and there is only 1 black male puppy in that litter. Should that black male puppy be determined to be the pick puppy, then that puppy will not be available for adoption. (If a deposit was taken to hold such puppy, then your deposit shall be immediately refunded).

Live video feed is usually running during the day and late nights after the litter turns 4 weeks. The link to the video feed shall be posted on the webpage (www.LabradorsRUs.com). Photos of the puppies throughout their stay here are also periodically posted on the webpage and Facebook. We expose the puppies to everything we can during their time with us, from different surfaces, noises, people and challenges. If weather permits, they will be exposed to swimming, will have been introduced to walks on a leash and have gone for at least 1 car ride before their departure.

Our pups are always a member of our family. By filling out this questionnaire, you are accepting the responsibility of lifelong care for your dog, and if, *for any reason*, you cannot keep your dog, your dog will come back to LabradorsRUs.

We feel our puppies are special, and want their new homes to be special. Our pups will need love and attention and training. Pups do not "settle down" as they get older, they must be taught correct behaviors and learn to be good citizens and members of the family. You must be willing to devote a substantial number of hours to caring for and training your new pup, or arrange to have the dog professionally trained. Everyone in your family needs to be on board with the training for your new puppy too!! We encourage our families to take puppy training courses as a family.

When you leave LabradorsRUs with your new puppy, remember you are now a member of our family! We love getting updates on our puppies' adventures with you and your family as they grow up. We also love it when our puppies come back to visit us! Sometimes the visit is just for a day or a few hours and other times they come back to stay with us while you go on vacation. You will receive a packet of information along with your puppy's medical record, AKC registration form, and pedigree.

Sweet puppy Dreams!
